# Funding your local energy project

Monika Paplaczyk, Investment Director

# Who we are

## Vision:

We believe in a clean, smart energy system that is powered by the investment of many.

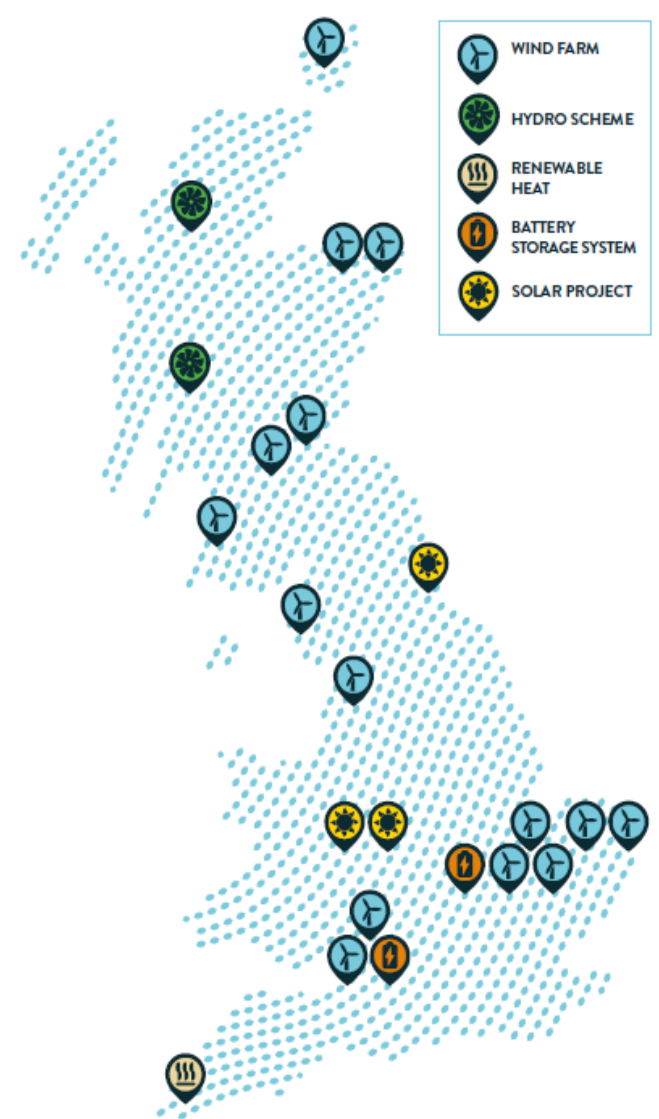

## Mission:

To power the transition to a sustainable energy future by helping people meaningfully connect with clean energy projects.

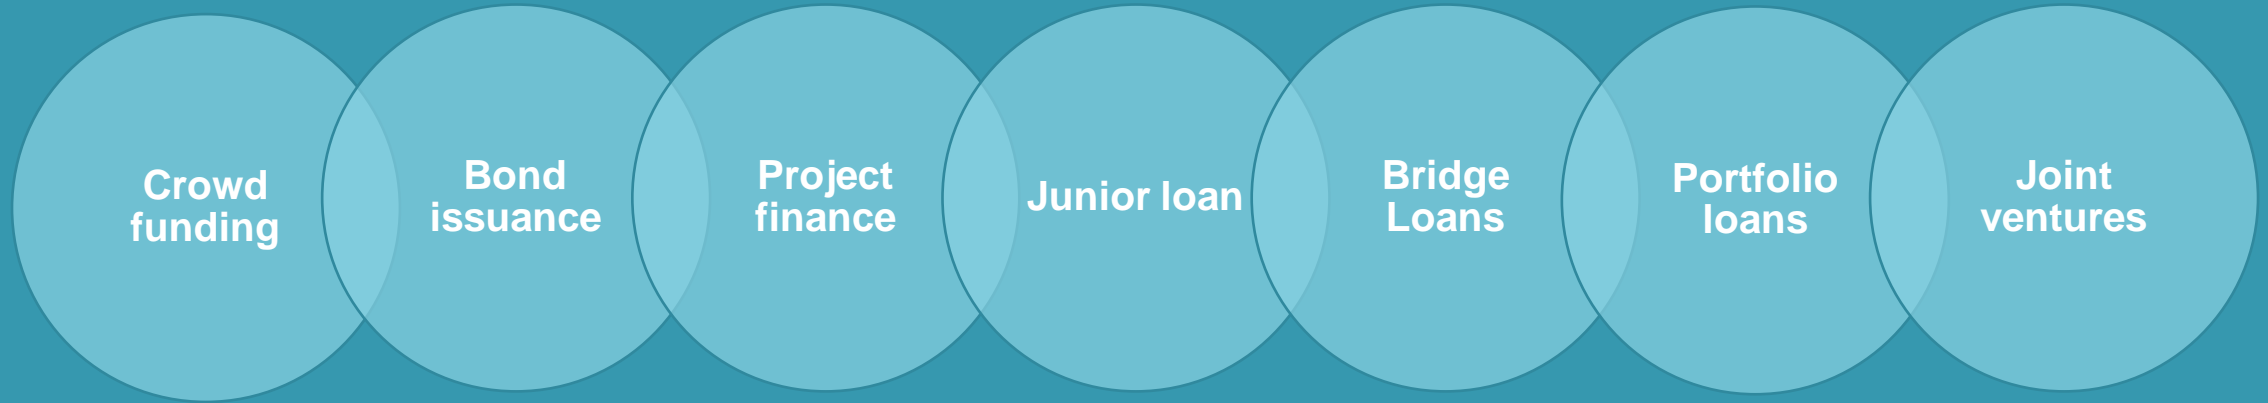

# What we do

- Sustainable energy investment company with one of the longest-run renewable portfolios in the UK. Founded by Triodos Bank as 'The Wind Fund' in 1994
- Connect a community of over 7,000 investors
- Developed, built and/or funded 32 clean energy projects
- Current portfolio of 24 projects including onshore wind, hydro, battery storage, heat and solar. Assets under management of £96 million in 2021
- Niche between communities and utilities
- Provide facilitating capital and plug funding gaps to build new renewable energy capacity in the UK
- Take a flexible, collaborative approach to project finance
- Worked with clients through a wide range of market changes and project developments, offering long-standing expertise and experience

# Different ways of funding projects

# Community funding

- **Community funding bridge:** If you are a community looking to own or build a clean energy project locally, and require funding to move quickly, then we could help bridge the funding gap.
- **Co-ownership:** We can provide you with funding and support to build or develop larger projects alongside public or private sector partners.
- **Co-development:** We can offer funding to support you through the development process to get new clean energy projects consented, built and operational.
